

# Table of Contents

|            |   |
|------------|---|
| Chapter 1: | Introduction to Electrical Engineering  |
| 1.3        | Fundamentals of Engineering Exam Review   |
| 1.4        | Brief History of Electrical Engineering   |
| 1.5        | System of Units<br>Prefixes, Engineering Notation   |
| Chapter 1: | Supplemental Problems and Solutions   |
| Chapter 2: | Fundamentals of Electric Circuits   |
| 2.2        | Charge, Current, and Kirchhoff's Current Law<br>Charge, Current, Nodes, Conservation of Charge, Kirchhoff's Current Law,<br>Interpretation of Signs                             |
| 2.3        | Voltage and Kirchhoff's Voltage Law<br>Voltage, Closed Path, Conservation of Energy, Kirchhoff's Voltage Law,<br>Interpretation of Signs  |
| 2.1        | Ideal Voltage and Current Sources<br>Ideal Voltage Source, $V$ - $I$ Characteristics, Ideal Current Source, $V$ - $I$<br>Characteristics  |
| 2.4        | Electric Power and Sign Convention<br>Power, Energy, Passive Sign Convention  |
| 2.6        | Resistance and Ohm's Law<br>Ohm's Law, Conductance, Power, Resistor, Open Circuit, Short Circuit,<br>Series Resistances, Voltage Divider, Parallel Resistances, Current Divider |
| 2.8        | Measuring Devices<br>Ohmmeter, Ammeter, Voltmeter, Wheatstone Bridge  |
| Chapter 2: | Supplemental Problems and Solutions   |
| Chapter 9: | Semiconductors and Diodes   |
| 9.3        | Circuit Models for the Semiconductor Diode<br>$V$ - $I$ Characteristics, Piecewise Linear Model, Transition Point, Assumed<br>States for Analysis, Strategy for Guessing States |
| 9.2        | The Semiconductor Diode<br>Non-Ideal Diode, $V$ - $I$ Characteristics, Piecewise Linear Model, Light-<br>Emitting-Diodes  |
| 9.5        | Zener Diode<br>Piecewise Linear Model, Shunt Regulator  |
| Chapter 9: | Supplemental Problems and Solutions   |

Chapter 8/15: Operational Amplifiers and Comparators

- 8.2 The Operational Amplifier (Op-Amp)  
Ideal Op-Amp, 0V-0A Property, Inverting Amplifier, Power Supply Limitations, Non-Inverting Amplifier
- 15.5 Comparator  
Ideal Comparator, Inverting Crossing Detector, Non-Inverting Crossing Detector

Chapter 8: Supplemental Problems and Solutions

Chapter 3: Resistive Network Analysis

- 3.2 The Node-Voltage Method  
Node-Voltage Inspection Property, Node-Voltage Analysis with Current Sources, Cramer's Rule, Node-Voltage Analysis with Voltage Sources
- 3.3 The Mesh-Current Method  
Planar Circuits, Mesh-Current Inspection Property, Mesh-Current Analysis with Voltage Sources, MATLAB, Mesh-Current Analysis with Current Sources
- 3.5 The Principle of Superposition  
Superposition, Zero Sources, Proportionality, Linearity
- 3.6 One Port Networks and Equivalent Circuits  
Thevenin's Theorem, Norton's Theorem, Source Transformations
- 3.4 Dependent Sources  
Dependent Voltage Sources, Dependent Current Sources, Node-Voltage Analysis with Dependent Sources, Mesh-Current Analysis with Dependent Sources, Op-Amp, Inverting Amplifier - Revisited, Modeling with Dependent Sources, Stereo Pan-Pot / Fader Circuit, Thevenin and Norton Equivalent Circuits with Dependent Sources

Chapter 3: Supplemental Problems and Solutions

Chapter 10: Transistor Fundamental

- 10.2 The Bipolar Junction Transistor (BJT)  
NPN, Active Region, Saturation Region, Cut-Off Region, Edge-of-Saturation, Edge-of-Cut-Off, PNP, Active Region, Saturation Region, Cut-Off Region, Edge-of-Saturation, Edge-of-Cut-Off

Chapter 10: Supplemental Problems and Solutions

Chapter 5: Transient Analysis

- 4.1 Energy-Storage Circuit Elements  
Capacitance,  $V$ - $I$  Characteristics, Power and Energy, Capacitor, Insulation Resistance, Parallel Capacitance, Series Capacitance, Inductance,  $V$ - $I$  Characteristics, Power and Energy, Inductor, Equivalent Series Resistance, Series Inductance, Parallel Inductance

|            |  |
|------------|--|
| 5.4        | Transient Response of First-Order Circuits<br>Step Response of an RC Circuit, RC Circuit Algorithm, Significance of the Time Constant, Step Response of an RL Circuit, RL Circuit Algorithm, Natural and Forced Response, Transient Response with an AC Source   |
| Chapter 5: | Supplemental Problems and Solutions  |
| Chapter 4: | AC Network Analysis  |
| 4.2        | Time-Dependent Signal Sources<br>Sinusoids, Cycle, Period, Frequency, Phase Angle, Amplitude, Average and RMS Values   |
| 4.4        | Phasors and Impedance<br>Vector Representation of Sinusoids, Phasors, Euler's Identity, Complex Numbers, Rectangular Form, Polar Form, Phasor Transform, Inverse Phasor Transform, Complex Algebra, Kirchhoff's Voltage Law with Phasors, Kirchhoff's Current Law with Phasors, Ohm's Law in the Frequency Domain, Impedance, Admittance |
| 4.5        | AC Circuit Analysis Methods<br>Series Impedances, Phasor Analysis Algorithm, Series Resonance  |
| Chapter 4: | Supplemental Problems and Solutions  |
| Chapter 6: | Frequency Response and Systems Concepts  |
| 6.1        | Sinusoidal Frequency Response<br>Fourier Series  |
| 6.3        | Filters<br>Low-Pass Filter, Bode Plots, High-Pass Filter, Band-Pass Filter, Band-Stop (Notch) Filter   |
| Lab I:     | Introduction to the Oscilloscope, Function Generator and Digital Multimeter  |
| Lab II:    | Introduction to Prototyping Circuits   |
| Lab III:   | Diode Curve Tracer   |
| Lab IV:    | Introduction to Microcontrollers   |
| Lab V:     | Build Your Own Digital DC Voltmeter  |
| Lab VI:    | Serial Liquid Crystal Display  |
| Lab VII:   | Power Amplifier for a Portable CD Player   |
| Lab VIII:  | DC Power Supply and Regulator  |
| Lab IX:    | Light Activated Exhaust Fan  |
